SHIVAM RAJPUT

Junior Data Scientist | Applied ML & AI Systems

Dehradun, India | shivamrajput.datascientist@gmail.com | LinkedIn | GitHub | Portfolio | LeetCode

PROFILE

Final-year B.Tech CSE (AI & ML) student with an **8.7/10 CGPA** focused on evidence-first Data Science. Built public systems spanning **15.95M-record analytics**, controlled experimentation, ML reliability, and grounded RAG. I prioritize reproducible analysis, explicit limitations, and engineering choices that make model results inspectable.

EVIDENCE SNAPSHOT

15.95M	+0.7692 pp	0.947	14/14
records processed	A/B absolute uplift	strict RAGAS composite	core tests passing

EDUCATION

B.Tech Computer Science Engineering (AI & ML) | Uttaranchal University, Dehradun | 2023-2027 | **CGPA: 8.7/10**

SELECTED PROJECTS

01 Customer Complaint Intelligence Platform | GitHub | Demo | Evaluation

- Processed 15.95M CFPB complaint records from an 8-9 GB raw CSV using chunked validation and reusable Parquet layers; built analytics, NLP routing, risk signals, and forecasting workflows.
- Achieved 3.57% MAPE on a six-month forecasting holdout; 75.28% product and 62.39% issue classification accuracy; 14/14 core tests passing.

02 Marketing A/B Testing & Experiment Analysis | GitHub

- Analyzed a 588,101-user controlled experiment: ad conversion 2.5547% vs PSA 1.7854%, producing +0.7692 pp absolute uplift (+43.09% relative).
- Estimated 95% uplift CI of +0.5951 to +0.9434 pp and tested statistical + practical significance using two-proportion inference, effect sizes, simulation, logistic consistency, and power analysis; did not claim ROI without cost/LTV inputs.

03 Agentic ML Audit Copilot | GitHub | Live App | Walkthrough

- Built a deterministic-first pre-training audit workflow for profiling, data-quality/leakage/imbalance checks, human review, baseline comparison, MLflow tracking, and SHAP evidence.
- Kept calculations and audit decisions in Python; limited the LLM to grounded explanation, report generation, and Q&A; exposed the workflow with FastAPI/Streamlit and packaged with Docker/LangGraph.

04 Enterprise RAG Assistant | GitHub | Demo | Evaluation

- Separated exact structured questions into deterministic Pandas analytics and semantic questions into BGE + BM25 hybrid retrieval with RRF, deduplication, CrossEncoder reranking, grounded answers, and citations.
- Strict 29-case RAGAS: 0.947 composite, 0.966 faithfulness, 1.000 context precision, 1.000 context recall. A separate 1,642-case benchmark passed defined factual/source/safety/conversation/HTTP gates; latency acceptance remains open.

TECHNICAL SKILLS

Data & Statistics: Python, SQL, Pandas, NumPy, PyArrow, Parquet, SciPy, Statsmodels, A/B Testing, Confidence Intervals, Hypothesis Testing, Forecasting
Machine Learning: scikit-learn, Classification, Regression, Cross-validation, Feature Engineering, Model Evaluation, SHAP, TF-IDF, Topic Modeling
Applied AI / NLP: Embeddings, BM25, Hybrid Retrieval, RRF, CrossEncoder, RAG, LangGraph, ChromaDB, Grounded Generation, Human-in-the-Loop
Engineering / MLOps: FastAPI, REST APIs, React, Vite, Streamlit, Docker, MLflow, pytest, Ruff, Git, GitHub Actions, MS SQL Server

ENGINEERING PRINCIPLES & CODING SIGNAL

Baseline before complexity | **Evaluation before claims** | **Deterministic code before LLM judgment** | **Limitations documented**
LeetCode public language counts: 483 Python3 | 75 MS SQL Server | 36 Pandas | **100 Days Badge 2026**

CURRENT FOCUS

DATA SCIENCE	CODING	ENGINEERING
Interview preparation, statistics, ML evaluation, SQL + Pandas	DSA / LeetCode, Python ownership, debugging and clean code	FastAPI, Docker, MLflow, CI/CD and deployment foundations

OPEN TO: Data Science · Machine Learning · NLP · Applied AI internships

Building Data Science systems where the evidence is as important as the model.
